

Rugged power - to move loads!

DanTruck 9000 Power+ series

DANTRUCK

Ergonomics, environment and user friendliness are just some of the characteristics of a DanTruck. We are at the cutting edge of technological development and always ensure that a DanTruck works both satisfactorily and efficiently.

DanTruck 9000 Power+ series

With its wheels firmly planted on the ground, the DanTruck 9000 Power+ series is an effective tool to make your daily handling jobs easier. Not only does it handle the heavy loads – it does so effortlessly.

The DanTruck 9000 Power+ series is industrial design at its best, with strong ergonomics and a high degree of customisation. The DanTruck 9000 Power+ series ensures optimal operation and performance as well as extremely low operating costs.

The DanTruck 9000 Power+ series is a powerful replacement for the familiar DanTruck 9000 from DanTruck A/S, which is one of Europe's leading manufacturers of customised, environmentally friendly diesel and LPG powered forklifts.

DanTruck 9000 Power+

Latest technology within all the component groups, which results in a number of advantages. As standard, the forklift is supplied with an electronic diesel engine with common rail, canbus control etc. In addition, an extensive options list makes it possible to satisfy even the very complex customer requirements.

9000
Power+

Unique Danish industrial design with attention to the total product as well as to the detail. A DanTruck stands out from the rest by its evident quality, dynamism and efficiency, and thus helps you in your daily work to a level where you are in total control.

POWER WITH INDUSTRIAL DESIGN!

Your strong partner!

CAB

The unique panoramic view provides optimum working conditions every day

THE CONTROLS

The simple operation of the joystick enables the operator to handle the loads in a safe and stable manner

ENGINE COMPARTMENT

A powerful and responsive engine combined with variable hydraulic pumps (option) provides optimum performance for every application

TILTING SILENCER

The tilting silencer can be laid flat for servicing under the cab

The components built into the DanTruck 9000 Power+ series are of a very high quality. Strong engines combined with a unique panoramic view from the cab ensure that your loads are always handled safely by the DanTruck 9000 Power+ series. The forklift provides exceptional surplus power, ergonomic operator position and simple handling, and has the potential to be your strong partner for many years to come.

1. The strong, welded clear-view mast ensures stable handling of the load.

2. The driver has optimal view on the load, even with the by DanTruck produced and known fork positioner with integrated side shift.

3. A unique cab with narrow profiles provides excellent visibility for the operator. The cab has been developed by using advanced computer technology, ensuring optimum ergonomic layout.

4. The pedals, steering wheel and electronic joystick can all be adjusted to suit the operator.

5. The "Single Pedal Drive" function allowing hydrostatic-style control can be switched on and off as required (option).

6. The new design silencer can be laid flat without dismantling, for instance when the cab is tilted to carry out servicing.

7. Robust Kessler drive axle with virtually maintenance-free oil-disc brakes.

8. Load-sensing provides better fuel economy, reduced wear and a lower noise level.

9. A powerful hydraulic fan, with variable speed, ensures efficient cooling of all vital components in all operating conditions.

POWER WITH POTENTIAL!

The DanTruck 9000 Power+ series is a combination of powerful design and selected special components. Like all DanTruck models, the series has been developed for safe operation for both company and operator, and it has the potential to become a strong partner in your daily work – for many years to come.

Right machine for the job!

TOP PERFORMANCE

KESSLER

Robust Kessler drive axle with virtually maintenance-free oil-disc brakes

DANA

Two-speed Dana transmission with fully automatic transmission control, electronic steering and the option of hydrostatic-style control (Single Pedal Drive)

PERKINS

Four or six cylinder Perkins diesel engine with common rail technology ensures high performance and controlled power application

GM

The powerful GM V8 LPG engine with IMPCO LPG evaporator combines powerful performance with low fuel consumption

BOSCH

The hydraulic system incorporates Bosch Rexroth components providing maximum performance and reliability, even in the most arduous applications

The capacity range of the DanTruck 9000 Power+ series is six to nine tonnes, with a choice of a four, six or eight cylinder engine and a 600 mm or 900 mm load centre.

DIESEL OR LPG

By far the lowest noise level on the market and an extremely comfortable, vibration-free and ergonomic cab. This allows the operator to easily exploit the huge reserves in the powerful four or six cylinder common rail diesel engines or eight cylinder LPG engines throughout a full working shift.

SERVICE

The central service panel makes daily service checks quick and easy

CATALOGUE

A forklift specific spare parts catalogue ensures that the correct spare part is always supplied

OPEN CAB

Service checks are quick and easy thanks to the hydraulically raised cab and the practical location of the various main components

POWER WITH ECONOMY!

Quality pays. Top quality ensures a long life and low operating costs.

The choice of quality components - with low energy consumption - has therefore been one of the key features in the development of the DanTruck 9000 Power+ series.

A promise of many options!

Clear-view masts with the lifting cylinders located behind the mast profiles ensure optimum visibility, affording a clear view of forks and load.

The low noise level ensures a good working environment for both operator and surroundings. Many years of development work has reduced the noise level to only 70 dB, which makes the DanTruck 9000 Power+ series a leader in its field.

ROTATING SEAT

The rotating seat allows the operator to turn through 180 degrees quickly. Instrument panel, steering wheel, seat and joystick can be turned to provide good visibility to the rear. This function is invaluable for instance when loads that obstruct forward visibility are transported over long distances.

RAISED CAB

The option of a raised cab will improve visibility and consequently safety when transporting large bulky loads.

Efficiency is not just a matter of engine power. The DanTruck 9000 Power+ series is, amongst others, equipped with a climate control system (option), comfort seat and steering column, both adjustable. A special seat adapted to suit the individual forklift operator is also available as an option. This increases not only work satisfaction, but also efficiency.

POWER WITH ERGONOMICS!

A sure winner!

Our focus on safety is just one of the elements which make DanTruck a sure winner. Similar to all our forklifts, the DanTruck 9000 Power+ series also offers good driving characteristics, optimal view and low operating costs.

SINGLE PEDAL DRIVE

In addition, the Power+ series offers the option of "Single Pedal Drive", which combines accelerator and brake function in one pedal - a strong alternative to hydrostatic transmission. The function, which can be switched on and off as required, makes it easier to manoeuvre the forklift in narrow spaces and on gradients.

POWER WITH SAFETY!

DanTrucks development engineers always focus on increasing safety - while at the same time reducing costs.

Great all-round strength

DanTruck

Unique industrial design, solid rugged power, innovation and thorough understanding of the individual customer's requirements. Those are some of the characteristics which make DanTruck A/S one of Europe's leading manufacturers of medium-heavy forklifts.

As a customer, you will gain a partner who prioritises power, safety, comfort and the environment. As a result of our purposeful development work, we are able to offer forklifts characterised by great all-round strength. Together we can provide smooth, highly productive machines yet at the same time being ever-conscious of the environment and low operating costs.

DanTruck A/S takes pride in increasing the quality of its products and being at the leading edge of the technological development. We look to the future, while at the same time building on our broad and long experience of constructing extremely versatile, customised forklifts.

DanTruck A/S has an international sales and service network. You can read more about this at our website dantruck.com, where you can also find our nearest dealer.
